

The Royer 166 has been built to give many years of profitable service. Over 30 years of expert engineering and experience have gone into making the Royer an outstanding machine for processing and shredding soil, peat humus, compost, and other organic material.

The Royer 166 is ideal for medium-sized applications and will provide quality throughput for years to come.

Typical Applications for the 166

- Landscape Contractors
- Municipalities
- Organic Mulch Suppliers
- Golf Courses
- Organic Recycling Companies
